

## The Ice Age Trail.

In a little over 3 years we hiked 1211.7 miles. We did what is called section hiking which means we hiked a bit then went home and then did it again and again! A lot of it on beautiful trail segments. Some on roads that were almost as pretty as the trails. Once or twice a short stretch on a highway. We passed so many hills, valleys, lakes, and rivers that I lost count. We saw so many wonderful things. My favorite section was the one I was currently hiking! We had a great time with good friends. We stayed in some great rental houses and occasionally a motel. We even camped for one segment. Then there was all the wildlife not including us! We saw Bear, Elk, Deer, Possum, Raccoons, Sasquatch, Porcupine, Otters, Beaver, Squirrels, Rabbits, Chipmunks, Mice, Shrews, Turtles, Toads, Frogs, Fish, Bald Eagles, Blue Herons, Swan, Turkeys, Owls, and of course many other birds. And a few fellow hikers as well! We had a great time on a great trail! Now to figure out our next adventure.
