Ice Age Trail Thousand-Miler Map and Checklist

Key to Symbols

Ice Age Trail — Connecting Route

Trade River 4.3 (0.4) mi • 3f — Segment label with segment name, mileage, and Atlas map number(s). Mileage noted as "4.3 (0.4) mi" means the segment length is 4.3 miles including a 0.4-mile connecting route within the segment.

CR 4.5 mi • 33f — Connecting route label with mileage and Atlas map number(s).

Bifurcation points

Using This Map

This map was created by an Ice Age Trail Alliance (IATA) volunteer based on the *Ice Age Trail Atlas* and the *Ice Age Trail Guidebook*. If you have questions, corrections, or suggestions, email info@iceagetrail.org.

The Ice Age Trail route changes slightly from year to year. Please refer to the Hiker Resource Map at IceAgeTrail.org for the most up-to-date Trail information.

An e-version of this Thousand-Miler Map and Checklist is available for free on the IATA website. It is enabled for commenting so you can write notes or mark segments you've hiked using Adobe Reader's† commenting tools. A 30 x 44 inch printed version is available from the IATA store.

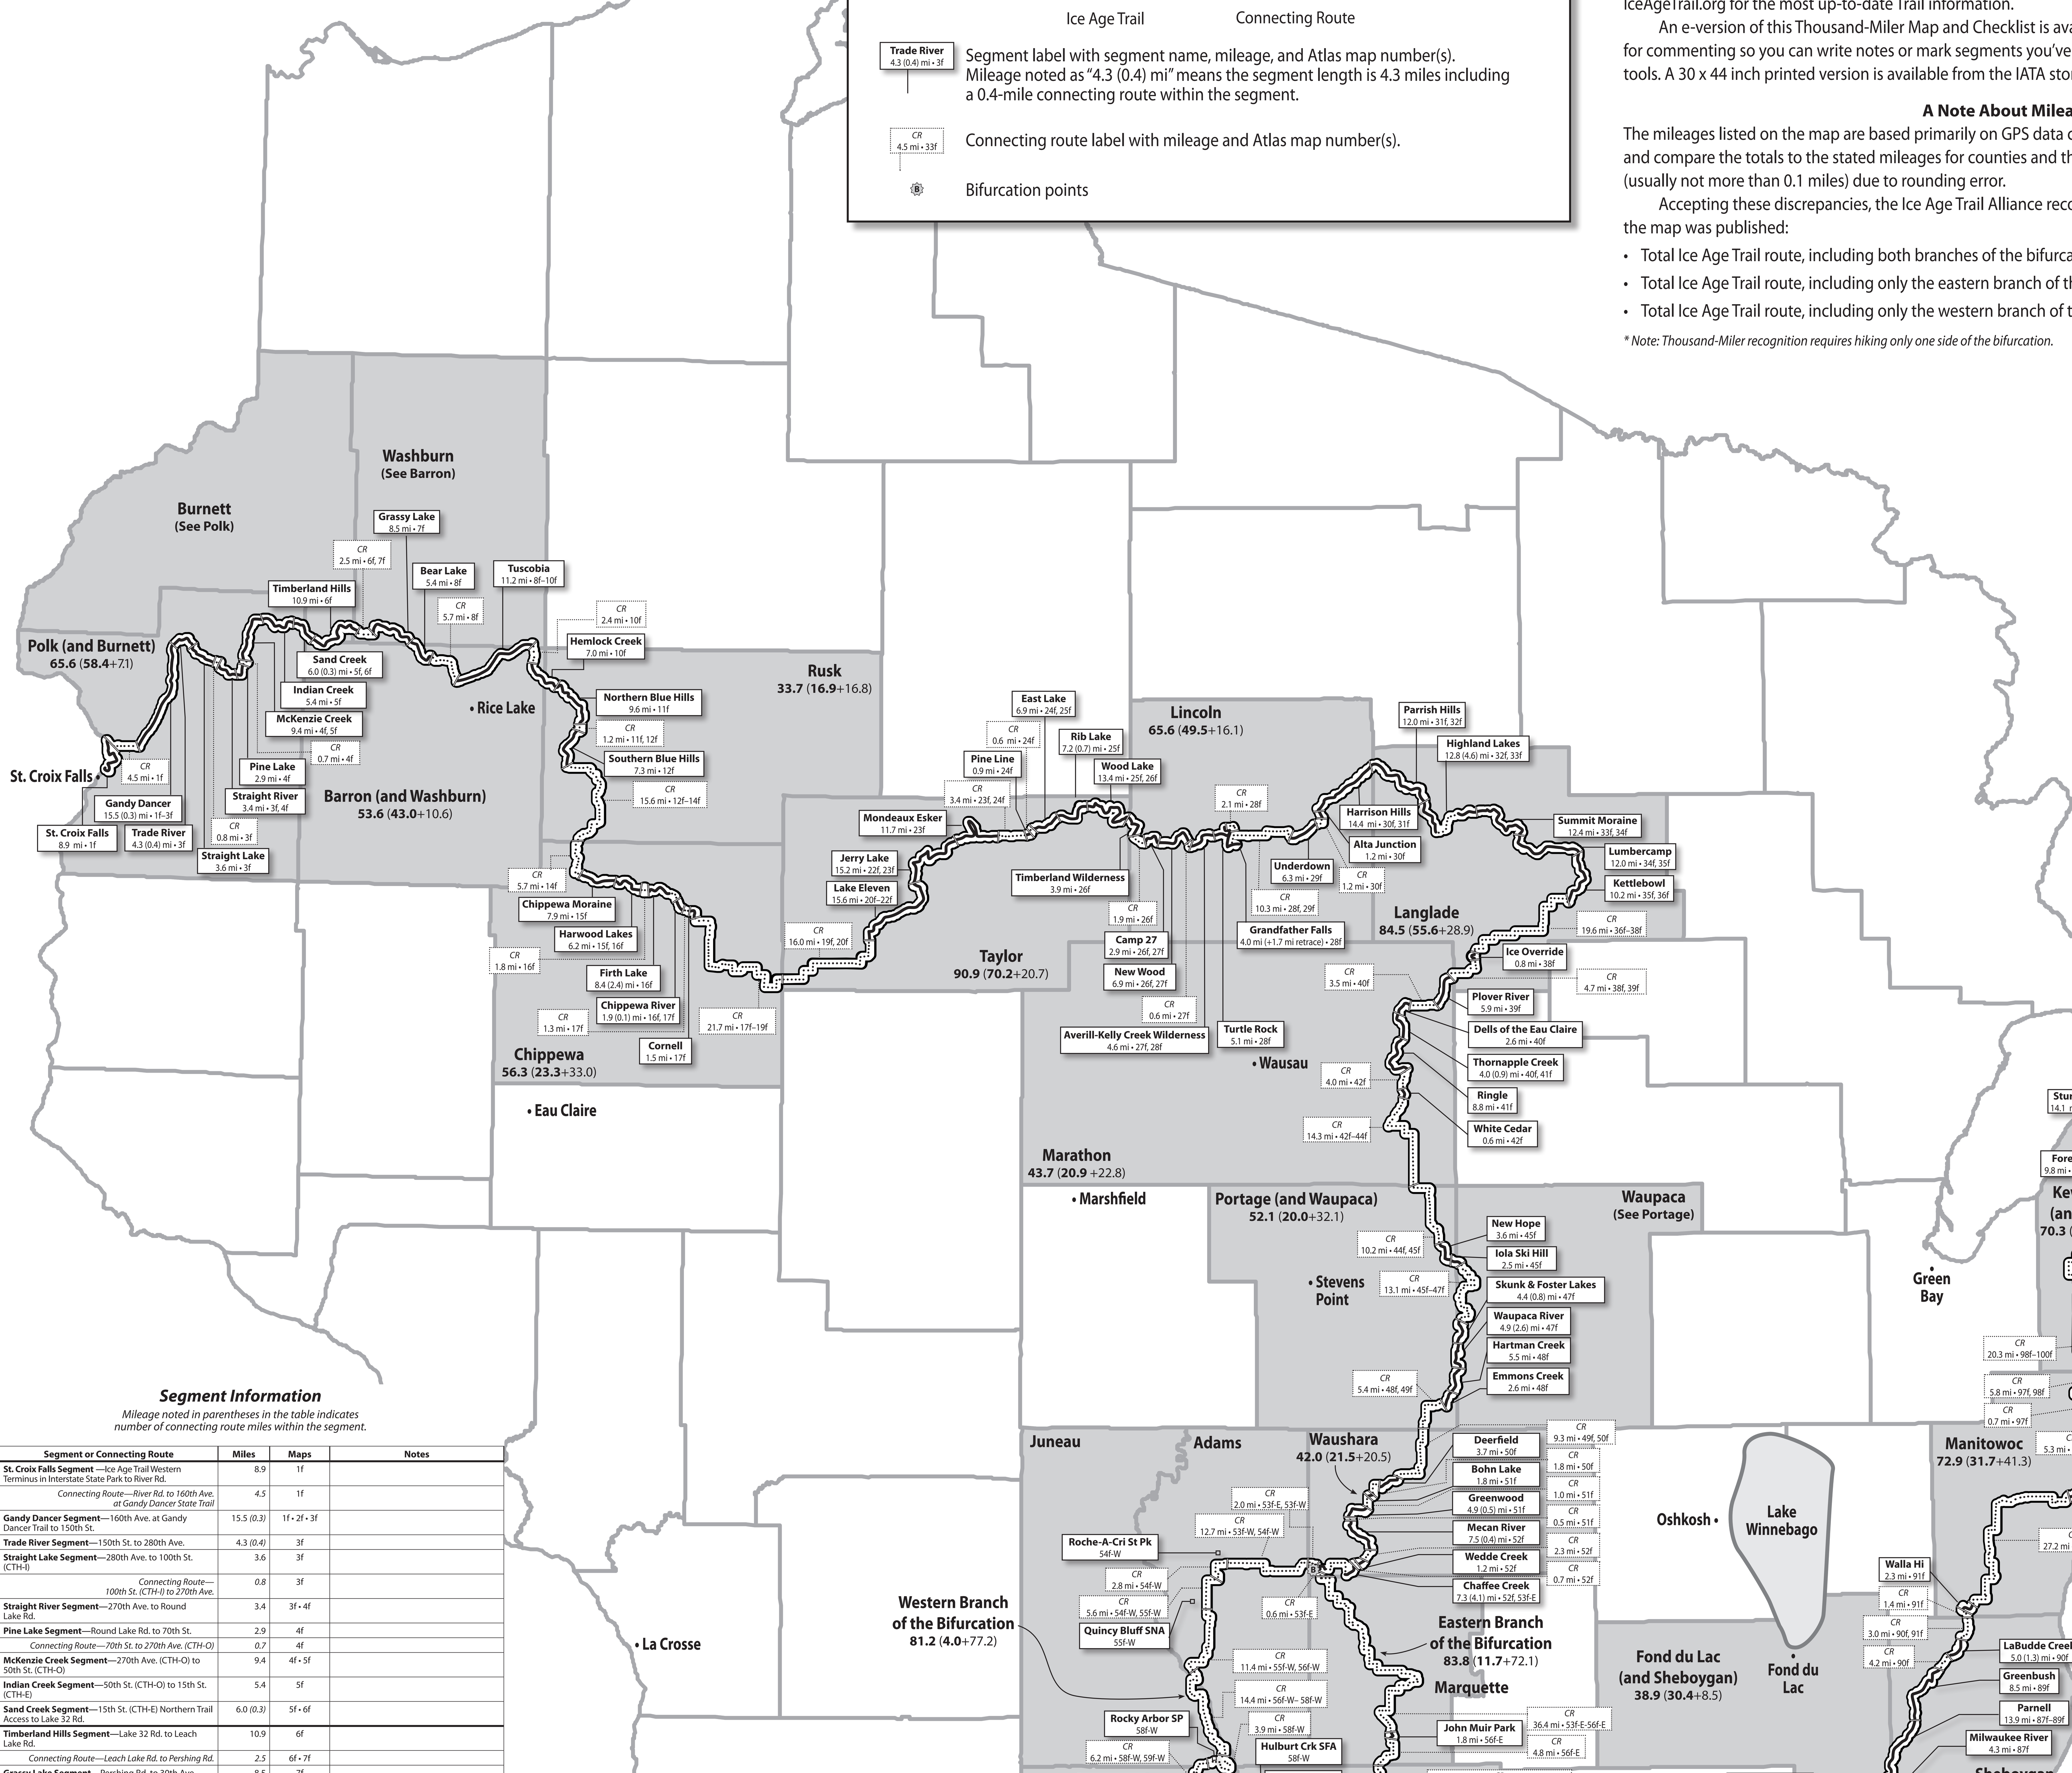
A Note About Mileages

The mileages listed on the map are based primarily on GPS data collected in the field. If you add up mileages and compare the totals to the stated mileages for counties and the entire Trail, you may find small discrepancies (usually not more than 0.1 miles) due to rounding error.

Accepting these discrepancies, the Ice Age Trail Alliance recognizes the following total mileages at the time the map was published:

- Total Ice Age Trail route, including both branches of the bifurcation: 1234.9 miles.*
- Total Ice Age Trail route, including only the eastern branch of the bifurcation: 1153.7 miles.*
- Total Ice Age Trail route, including only the western branch of the bifurcation: 1151.1 miles.*

** Note: Thousand-Miler recognition requires hiking only one side of the bifurcation.*



Segment Information

Mileage noted in parentheses in the table indicates number of connecting route miles within the segment.
